

Streamline payments for your merchants using Quickbooks®

Let your merchants skip the double entries and have QuickBooks SyncPay handle transactions from start to finish. From processing payments to creating accounting entries, QuickBooks SyncPay handles it all within the QuickBooks environment.

FEATURES

SyncPay supports payment processing directly in QuickBooks

Process batch transactions and view batch reports

Allows merchants to pay invoices and generate sales receipts

Process multiple payments against open invoices at the touch of a button

Compatible with QuickBooks Pro®, QuickBooks Premier® and QuickBooks Enterprise®

Supports end-to-end encrypted card-present swiped transactions after attaching a hardware-encrypted secure card reader

BENEFITS

- Merchants can process transactions, create appropriate accounting entries and mark transactions as paid right in QuickBooks with assistance from SyncPay
- Help merchants streamline and save time managing their accounting processes
- Not only is QuickBooks SyncPay ideal for merchants who are in a back office and take payments over the phone, but also those who accept retail, card-present (non-EMV) transactions
